#### • Comprehensive measurement functions

Providing all the well-known measurement parameters :

Impedance (Z)、Admittance (Y)、Phase Angle ( $\theta$ )、Reactance (X)、Conductance (G)、Susceptance (B)、Inductance (L)、Capacitance (C)、Quality Factor (Q)、Dissipation Factor (D)、Resistance (DCR)

#### • Continuous frequency range from 20Hz to 1MHz

Providing a continuous variable frequency from 20Hz to 1MHz, 5 digits resolution, testing all components at the desired test frequency, allowing a component to be tested at its actual operating frequency.

#### • Multi step

Tuning voltage, frequency, and testing parameters arbitrarily, making complicated testing become easier.

#### • Fast ! Accurate ! Stable !

Testing components is easy with 6375 Series LCR Meter. Just connect the component and the meter accurately measures the component, displaying selected primary and secondary value with a basic accuracy of 0.1%.

#### • Flexible! Full remote control!

Providing control and output capability, the 6375 Series offers useful interface such as GPIB, RS232 and handler port, making remote control straightforward.
