

# R&S® FPC1500 Spectrum Analyzer with the Value of Three

## Unexpected performance in entry class

The perfect choice for	
R&D and service labs	Test automation
Professional hobbyists	Education and training
Key specifications	
Frequency range	5 kHz to 1 GHz with upgrades up to 3 GHz
Max. input power	Up to +30 dBm
Low noise floor	Down to -165 dBm (typ. with preamplifier)
Connectivity	LAN, USB, Wi-Fi (optional)
Measurement options	modulation analysis, receiver mode, advanced measurements
Tracking Generator	5 kHz to 1/2/3 Ghz
Your benefit	Features
Value of three	R&S®FPC1500 combines the value of a spectrum analyzer, a vector network analyzer and a signal generator
More resolution for better measurements	Lowest noise floor in its class, down to -165 dBm (typ. with preamplifier), Resolution bandwidth down to 1 Hz, 10.1" WXGA display
Investment protection	All upgrades available via keycode, no additional calibration required

### Value of three

R&S®FPC1500 combines three instruments in one:

#### ■ Spectrum analyzer

The R&S®FPC1500 base instrument has a frequency range from 5 kHz to 1 GHz with keycode options to unlock up to 3 GHz and other features. Engineered in Germany, it provides the best dynamic range in its class. In combination with RBW settings down to 1 Hz, it resolves the finest details, which are displayed on the high-resolution 10.1" WXGA display. Wired or wireless remote control options are available free of charge.

#### ■ Network analyzer

The R&S®FPC1500 features an internal VSWR bridge that makes purchasing and mounting/dismounting an external bridge unnecessary. S11 reflection measurements are supported, including Smith chart and DTF features.

#### ■ Signal generator

The R&S®FPC1500 not only features standard tracking generator measurements with frequency offset functionality, its signal source is independent to enable signal generator functionality. A CW signal can be set within the frequency range, or in a coupled mode to follow the center frequency setting of the spectrum analyzer mode.
